PROFESSIONAL SUMMARY

Backend software engineer with 3.4 years of experience building production-grade Java and Spring Boot systems, with a strong quality-engineering habit including structured code reviews, PR discipline, and test coverage raised to ~85% on a prior project. Comfortable designing RESTful microservices, troubleshooting distributed systems via structured logging and root-cause analysis, and maintaining backward compatibility through zero-downtime releases.

TECHNICAL SKILLS

Languages: Java, Python, JavaScript

Backend & Microservices: Spring Boot, Spring Security, REST APIs, Microservices Architecture, gRPC, Apache Kafka, Concurrency & Multithreading, System Design

Cloud & DevOps: AWS (EC2, S3), Google Cloud Platform, Docker, CI/CD, Git

Databases: MySQL, MongoDB, Cassandra, Elasticsearch, Redis, SQL Optimization

Testing & Tools: Unit & Integration Testing, API Testing (Postman), Code Reviews, API Versioning, Swagger, JWT, Agile/Scrum, Angular (basic)

PROFESSIONAL EXPERIENCE

Software Developer - Chayse Consulting Limited, Luton, UK Feb 2022 – Feb 2024

- Architected and maintained RESTful APIs within a microservices-based system, handling authentication, distributed data flows and high-concurrency scheduling workloads.
- Raised unit and integration test coverage to ~85% through structured code reviews and PR practices, reducing post-release defects and improving deployment confidence.
- Designed, built and shipped production-grade backend services in Java and Spring Boot across SaaS and travel platforms serving thousands of active users.
- Migrated location-based search from MySQL to Elasticsearch, reducing average query latency by ~40% and improving scalability under peak traffic.
- Re-engineered appointment scheduling and time-slot allocation logic to eliminate race conditions, improving booking consistency under concurrent load.
- Cut AWS S3 storage costs by ~60% by building automated media compression pipelines with no perceptible quality loss.

Software Engineer - Outline Systems India Pvt. Ltd., Mohali, India Jul 2024 – Aug 2025

- Contributed to a large-scale government digital platform requiring strict auditability, traceability and compliance guarantees.
- Diagnosed distributed system issues using structured logging and root-cause analysis, reducing recurring production incidents.
- Executed backend API refactoring and data migrations while maintaining backward compatibility and zero-downtime deployments.
- Optimized database query execution plans and indexing strategies, reducing API response times by ~25%.
- Migrated read-heavy workloads from Cassandra to Elasticsearch, improving search performance and operational observability.
- Designed and implemented end-to-end user activity logging pipelines persisted across relational databases and Elasticsearch clusters.

EDUCATION

MSc in Data Analytics - Dublin Business School, Dublin, Ireland 2025 – 2026

Bachelor of Computer Applications - Chandigarh University, Mohali, India 2019 – 2022
